

1U, TFT screen with keyboard and KVM switch

reddot design award winning Eldon solution

As a customer you may expect nothing less than the best quality from Eldon, especially in critical environments. To explore the advantages this product offers you, the following features have been incorporated:

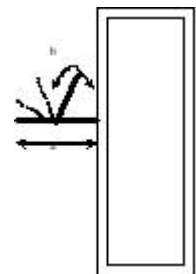

- 1U high telescopic 17-Inch TFT screen, even including the KVM-switch the height will remain only 1U
- Optional KVM switches, for 4, 8 and 16 connections to be controlled by one unit
- High quality 17-Inch TFT screen, resolution 1280x1024 (SXGA), 16.7 mil. colours
- Optional front USB port for easy upload of new software or extra mouse connection
- The keyboard and screen can be **fully** withdrawn (a) from the rack, which makes it possible to place the screen under any (backwards)angle (b) see drawing
- As the screen is equipped with friction hinges, to prevent it from falling down, it can be placed under any desired viewing angle, for optimum viewing
- Maximum safety is guaranteed, as a slide-in lock prevents the screen from sliding back into the rack when operating it
- Supplied including cable guide at the rear, which ensures a safe cable guide when the monitor is slided in or out of the rack
- One unit, suitable for 3 connections PS2, SUN and USB
- Keyboard options are available in the following languages: International (standard), German, English, French, Spanish
- Touchpad can be inter-changed by a track ball
- Only high quality components used, especially important for the keyboard as it is one of the most intense used parts

The international highly respected **reddot design award** granted the Eldon design with their prestigious award for quality and design.

Extra options:

- Also available in RAL 7035
- Full size key pad with large keys
- Touch Screen!
