

Eldon: Global Growth Through Customer Satisfaction

One of the world's leading developers and manufacturers of electrical and data and telecommunications enclosures, Eldon offers our clients more than 80 years of experience meeting their needs with state-of-the-art products and responsive service.

Our ongoing strategy of growth through the building and maintenance of long term customer-centric relationships has been paying dividends across the globe. Since 1922, Eldon has grown from its humble beginnings in Nassjo, Sweden to a multi-national concern with four manufacturing plants spread across Europe and one newly on line in northern India. With an eye to rapid delivery time and employing the latest production methodologies, our manufacturing facilities supply innovative, high quality enclosures and accessories to our 12 sales offices and network of agents strategically positioned throughout the world.

At Eldon our mantra is "Eldon makes it easy." No mere slogan, this imperative defines our interactions with our customers. From rapid product fabrication and quick delivery to designing the most complex custom enclosures to precise specifications, our highest mission is to ensure that working with Eldon is an easy, satisfying and profitable endeavor for our customers and distributor partners.

Today's management team believes in the same fundamental principles that have enabled the firm's nearly 90 years of growth— innovative design, product quality and customer satisfaction. We are committed to continuous improvements across all aspects of our business, including the investments in new technology necessary to support future growth.

Eldon, a company easy to do business with!

Eldon Manufacturing: Spread Across Europe & India

England

Opened in 1985 in Rotherham, the home of stainless steel, Eldon's production is entirely devoted to the manufacture of stainless steel enclosures and their accessories. Using local materials and local skills built up from generations of craftsmen working with this complex material, our Rotherham facility employs the latest 3D CAD CAM technology to produce one of the largest ranges of standard sized enclosures on the market. Small teams work in dedicated cells to ensure our production schedule is flexible and can react nimbly to the changing needs of the market as well as individual customer orders.

Spain

Located in southern Spain—in Andalusia—Martos is a small but busy industrial town surrounded by olive groves. A factory originally built by HIMO S.A. in the late 70's to manufacture enclosures was acquired by Eldon in 1990 and is now the center of production for our Multi-Mount® range of mild steel enclosures. The facility is completely automated, meaning the enclosures are punched, bent, welded and painted without the need for human intervention.

This is also where every Multi-Mount® enclosure is uniquely painted inside and out, using Eldon's structured powder coating to ensure the maximum protection against corrosion.

Romania

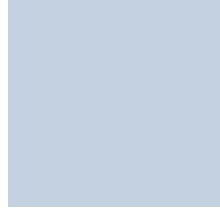

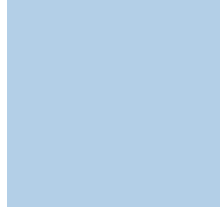

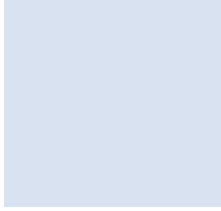

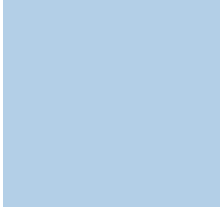

One of our largest recent investments has been the construction of an entirely new factory on a green field site during 2006-2007. Situated in the heart of Transylvania, Eldon was the first company to move into a new Industrial Estate in the town of Prejmer. The Romanian plant is the busy hub of production for wall mounting enclosures in both mild and stainless steel. In 2009 the plant brought a second production unit online.

The increased capacity makes our Romanian plant the largest production facility in the Eldon group.

India

Located in Umbergaon, Distt. Valsad, Gujarat State, our factory in India is approximately 150 km from both Mumbai and Ahmedabad. Already a recognized brand on the subcontinent, Eldon continues to gain popularity among customers as a provider of high quality enclosures and accessories. The Eldon sales team works with our customers and our distributors located strategically throughout the country to make certain the growing Indian appetite for enclosures is being met. Eldon's Indian manufacturing facility means we can not only deliver products to our Indian customers more quickly, but also that we are in a position to provide better prices than our competition.

Eldon Quality

Defining the word quality at Eldon doesn't stop at with bringing a quality product to market. At Eldon quality stands for a lot more. From our strategic goals and state-of-the-art ISO9001 accredited manufacturing facilities to the selection of our distributor partners, quality represents a hallmark for the type of company we are now and the way we will continue to define ourselves—from our CEO to our sales people to our customer service team—moving forward.

We believe that continually striving to improve is not merely about our passion to deliver quality products, it's about living by a code that defines our interactions with our customers on every front. Quality at Eldon is about where we locate our plants and sales offices, our product portfolio, the latest tools for enclosure ordering we bring to our customers and our commitment to innovation, rapid delivery and responsive customer service. At core, Eldon quality is about adding value to our products, to our service, and ultimately to our customers.
